

Omni Matrix

Side-by-Side Feature Comparison — Lygiron catalogue vs. what is built

Each row puts the **intended Lygiron feature** on the left beside **what Omni Matrix actually has today** on the right, so missed areas are easy to spot. Rows are tinted by status: **green = Built**, **amber = Partial**, **red = Missing**. The red rows are the gaps.

178 catalogue features assessed · 12% built, 16% partial, 71% missing.

Layout and navigation (9/15 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Player-specific screen	Dashboard, sheet, action log, and dice tray in one player layout.	BUILT	Built: character canvas + roll log in one layout.
GM-specific screen	Swaps the dashboard for a roster + multi-sheet workspace, keeps log & tray.	BUILT	Built: GmConsole multi-sheet workspace with log + dice tray.
Persistent identity panel	Name, portrait, key resources, health stay pinned while the sheet scrolls.	MISSING	Not built — canvas scrolls as one; no sticky header.
Tabs view	Organises the sheet into ruleset/GM-defined tabbed sections.	BUILT	Built: multi-page layout tabs; add / rename / delete.
Saved view preference	Remembers Tabs/List view, active tab, scroll, density, log settings per user.	PARTIAL	Partial: layout persisted; density / scroll / log not saved per user.
Sheet search	Filters visible stats, actions and entries as the user types.	MISSING	Not built.
Tag and category filters	Finds related content (e.g. fire abilities) without exact names.	MISSING	Not built.
Collapsible groups	Reduce long sections while keeping contents and pinned rows.	MISSING	Not built — blocks hide entirely; no in-place collapse.
Full / Compact / Minimal density	Adjust supporting detail without changing values or controls.	MISSING	Not built — defined in architecture, not yet in UI.
Responsive workspace	Reflows 3 > 2 > 1 columns as space shrinks.	PARTIAL	Partial: grid reflows; no explicit column breakpoints.
Combat-focused view	Hide non-combat groups and expand relevant ones in combat.	MISSING	Not built.
Personal pinning	Mark frequent rows; in combat they jump to the top of the section.	MISSING	Not built.
Stable layout during play	Progressive disclosure avoids unexpected reflow.	PARTIAL	Partial: snap-grid is stable; no disclosure pattern.
Controller region navigation	Predictable focus grid + region jumps instead of a cursor.	MISSING	Not built.
Touch support	Tap, long-press, touch-sized controls for tablets.	MISSING	Not built — no explicit touch optimisation.

Identity, stats, and resources (8/18 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Character identity card	Portrait, name, archetype, class, clan, background or template field.	PARTIAL	Partial: editable name only; no portrait / archetype field.
Portrait management	Upload, crop, share to chat, ping linked token.	MISSING	Not built.
Body-location health summary	Functional state of head/torso/arms/legs + condition icons.	MISSING	Not built — sits in Tempus (product 03), not OM.
Full health view	Detailed health/trauma when the ruleset has location damage.	MISSING	Not built — Tempus scope.
Dot tracks	Rated traits / proficiency / temporary spends as dots.	BUILT	Built: 'dots' field type fully rendered.
Resource bars	Current/max for health, mana, stamina, willpower.	BUILT	Built: 'pool' field (current / max) fully rendered.
Number fields	Large numerics: defense, speed, initiative, armor.	BUILT	Built: 'number' field fully rendered.
Counters / checkbox series	Ammo, charges, uses, stress, discrete states.	BUILT	Built: 'track' box field with states.
Base and temporary values	Separate a lasting value from buffs/penalties.	MISSING	Not built — no temp / base separation.

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Effective value display	Final value after temporary + system contributions.	PARTIAL	Partial: derived final value shows; no temp breakdown.
Inline specializations	Specialization beside its attribute, carried into the roll.	MISSING	Not built.
Stat descriptions	Rules text, constraints, explanations without clutter.	PARTIAL	Partial: 'help' key in format; UI tooltip unconfirmed.
Stat relationships	derived-from, prerequisite, adds-to, capped-by, opposed-by.	MISSING	Not built — tracked internally, not exposed.
Computed values	Derived stats update automatically when inputs change.	BUILT	Built: live reactive derived values (expression.mjs).
Formula disclosure by role	GMs audit calculations; protected formulas stay limited.	MISSING	Not built — no GM formula-audit view.
Manual override	Replace a computed value without deleting its formula.	MISSING	Not built.
Permission-aware rows	GM-only, approval-gated, read-only, hidden, system-calculated.	PARTIAL	Partial: editable player/gm/none in format; UI enforce unconfirmed.
Validation feedback	Flags missing rules, bad bounds, broken refs, calc errors.	PARTIAL	Partial: cycle / bad-ref detection in engine; no rich UI.

Actions, abilities, and entries (6/11 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Reusable action rows	One interaction pattern for features/actions/powers/resources.	PARTIAL	Partial: named rolls act as rows; no general pattern.
At-a-glance costs and uses	Activation, cost, uses, status, prerequisites as chips.	MISSING	Not built.
One-step execution	Run an executable action from its row; else open details.	PARTIAL	Partial: named rolls fire in one click; not general.
Automatic bookkeeping	Apply costs, use limits, resource changes on resolve.	PARTIAL	Partial: resources.costs in format; engine apply unconfirmed.
Blocked-action explanations	Disable + explain when perms/prereqs/cooldown/resources block.	MISSING	Not built.
Entry details	Full rules text, facet info, related actions on demand.	MISSING	Not built.
Entry search and filtering	Search large lists by name and official tags.	MISSING	Not built.
Restricted choice pools	Limit selectable options to template-allowed entries.	MISSING	Not built.
Manual recovery request	Player requests a GM-approved recovery instead of bypassing.	BUILT	Built: ProposePanel queues requests to GM.
Pending approval state	Player sees a waiting request; GM gets approve / deny.	BUILT	Built: GM Requests panel approve / deny.
Non-destructive entry evolution	Preserve old facet data when a preset / facet changes.	MISSING	Not built.

Rolling from the sheet (15/17 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Quick Roll	Roll a single stat or action from its row.	BUILT	Built: named rolls trigger from the sheet.

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Compose Roll	Combine multiple sources (attribute + ability) before rolling.	MISSING	Not built.
Touch-friendly compose mode	Multi-select flow when Shift isn't available.	MISSING	Not built.
Mixed dice pools	1d20 + 2d10 + 1d6 with a visible pool summary.	MISSING	Not built — only pool-success d10; polyhedral later.
Mean-value rolls	Roll from the mean of 2-4 selected stats when enabled.	MISSING	Not built.
Automatic-success resources	Add Willpower etc. as automatic successes when allowed.	MISSING	Not built.
Situational modifiers	Called shot, moving target, difficulty, bonus die.	MISSING	Not built — no pre-roll modifier UI.
Split-pool actions	Divide one pool across several declared actions.	MISSING	Not built.
Chance-roll fallback	Switch to a fallback roll when a pool drops to zero.	MISSING	Not built.
Source-coded pool breakdown	Identify contributions from attributes/skills/powers/armor.	MISSING	Not built — totals only; no per-source attribution.
System-specific outcomes	Criticals, botches, degrees, panic, raises per ruleset.	BUILT	Built: successes / crits / overreach / ruin per config.
Roll type tags	Classify as attack/save/damage/social/opposed for filtering.	MISSING	Not built.
Saved roll templates	Store frequent source/modifier/tag combos for recall.	MISSING	Not built — definition rolls exist; no user-saved templates.
Campaign roll templates	GM prepares roll configs to share with players.	MISSING	Not built.
Open and whispered rolls	Public rolls or GM-only result when permitted.	MISSING	Not built.
Result overlay	Outcome over the tray for a set time, then back to tray.	MISSING	Not built — results append to the log.
Persistent prepared tray	Keep sources/params after a roll to reroll or tweak one value.	MISSING	Not built.

Action Log and result transparency (13/18 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Unified activity panel	Rolls, actions, events, chat in one resizable side panel.	BUILT	Built: shared action log collects all events.
Dice and Full modes	Focus on roll results or the wider sequence of changes.	MISSING	Not built — single flat log view.
Player-limited log	Players see own rolls + events affecting them only.	MISSING	Not built — all entries visible to all connected users.
Complete GM log	GM gets dice, actions, events, approvals, initiative.	BUILT	Built: GM console shows all events incl. approvals.
Glance / Compute / Trace levels	Concise result > calc on focus > full breakdown on expand.	MISSING	Not built — flat entries, no hierarchy.
Readable calculation rows	Sources, modifiers, target, result, outcome as an equation.	PARTIAL	Partial: successes / outcome show; not a formatted equation.
Action cost history	Resource values before/after, multi-cost, intermediate checks.	PARTIAL	Partial: actions logged; before/after not recorded.
Human-readable rules trace	What changed, why, which inputs, how randomness applied.	MISSING	Not built.
Search and filters	Filter by actor, event type, source, time, tags, text.	MISSING	Not built.

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Collapsible entries	Keep the log compact while preserving detail.	MISSING	Not built.
Linked event chains	Connect actions to rolls, rerolls, resistances, costs.	MISSING	Not built.
Entry pinning and copying	Keep entries visible; copy content for notes.	MISSING	Not built.
Whisper discussions	Private discussion about a log entry.	MISSING	Not built.
System-aware rerolls	Offer only the reroll / spend actions the ruleset supports.	MISSING	Not built.
GM ruling notes / override	Annotate or override an outcome without erasing the entry.	MISSING	Not built.
Reveal controls	Reveal all / part / custom summary of a secret result.	MISSING	Not built.
Retroactive visibility changes	Auditably change who can see an existing entry.	MISSING	Not built.
Approval actions	Approve or deny pending resource / action requests from the log.	BUILT	Built: GM Requests panel in live session.

GM live-session: Roster & multi-character control (5/10 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Character roster	PCs, NPCs, monsters, artifacts in one list.	BUILT	Built: localStorage roster + live session roster.
Player character cards	Portrait, identity, level/archetype, stat-shape preview.	BUILT	Built: compact GM cards (dots/pools/tracks/statuses).
Roster search	Find entities by name or description in real time.	MISSING	Not built.
Stackable roster filters	Combine tags: NPC, enemy, alive, current scene.	MISSING	Not built.
Saved filter sets	Store recurring views (e.g. current combatants).	MISSING	Not built.
Custom roster order	Drag-and-drop ordering saved with the session.	MISSING	Not built — not user-configurable.
Character lifecycle actions	Duplicate, archive, delete with in-scene safety checks.	PARTIAL	Partial: new + delete built; no duplicate / archive.
Adaptive multi-sheet grid	Open 1, 2 or 4 sheets at once for comparison.	BUILT	Built: column toggle in GM console.
Panel focus controls	Focus, maximize, pin, close, cycle open sheets.	PARTIAL	Partial: column count adjusts; no per-panel focus / pin.
Read-mostly secondary panels	Reduce accidental edits in dense multi-sheet layouts.	MISSING	Not built — not enforced.

GM live-session: Effects & adjudication (8/9 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Roster multi-select	Select several PCs/NPCs/artifacts as one target set.	MISSING	Not built.
Batch effect application	Apply a status/buff/debuff/environmental to all targets.	MISSING	Not built.

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Recent / favourite effects	Keep frequent effects handy without reopening the palette.	MISSING	Not built.
Effect search and categories	Find effects by name; browse conditions/buffs/debuffs.	MISSING	Not built.
Default one-step apply	Use the effect's default duration/stacks/potency/visibility.	MISSING	Not built.
Optional effect parameters	Expand an editor to change duration/stacks/potency.	MISSING	Not built.
Immediate state feedback	Update roster badges, sheets, log after an effect.	PARTIAL	Partial: status toggles update session; no roster badges.
Partial-failure handling	Apply to valid targets; report which failed and why.	MISSING	Not built.
Per-application visibility	Public, affected-only, or GM-only effect events.	MISSING	Not built.

GM dice control (9/10 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
NPC quick-switch	Rebind the tray to a recent NPC without opening the sheet.	MISSING	Not built.
Ad-hoc / fortune rolls	Rolls for hazards/weather/reactions with no character source.	PARTIAL	Partial: GM rolls on behalf of roster; no character-free roll.
Challenge parameter control	Set difficulty / DC / target / position / bonus dice.	MISSING	Not built.
Hidden challenge values	Keep a difficulty private with a clear placeholder.	MISSING	Not built.
Secret rolls	Hide existence + result of a roll until revealed.	MISSING	Not built.
Opposed rolls	Resolve two linked pools in one tray and compare.	MISSING	Not built.
Group roll requests	Send one check to several players, collect grouped results.	MISSING	Not built.
Player tray mirror	GM inspects/adjusts a player's tray; player still presses Roll.	MISSING	Not built.
Tray lock	Protect GM tray changes from accidental player edits.	MISSING	Not built.
Post-roll adjudication	GM changes difficulty / spends on behalf / records a ruling.	MISSING	Not built.

GM template / homebrew: Unified Template Workspace (8/11 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Single authoring workspace	Layout, rules, formulas, bindings, live preview in one tool.	MISSING	Not built — definitions edited as JSON externally.
Preset-first start	Start from a system / family preset or blank template.	PARTIAL	Partial: one sample system; no preset picker UI.
Broad system coverage	6 resolution families, 13 systems, 14+6 presets.	PARTIAL	Partial: one dice model; architecture supports more.
Starter templates	Editable starts for d20, d100, dice-pool, step-die.	MISSING	Not built.

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Object Tree	Searchable hierarchy of widgets/stats/rules/bindings.	MISSING	Not built.
Selection-driven Inspector	Show properties for the selected object only.	MISSING	Not built.
Live test-character preview	Player view, GM view, roll sim while editing.	MISSING	Not built.
Play and Edit modes	Switch canvas between runtime and authoring.	PARTIAL	Partial: block picker is rudimentary; no true mode switch.
Protected editing session	Disable player interaction during a live edit.	MISSING	Not built.
Undo and redo	Cover placement, reorder, resize, property, link changes.	MISSING	Not built.
Unsaved-change protection	Save / Discard / Cancel before leaving Edit mode.	MISSING	Not built.

Sheet construction (5/11 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Widget catalogue	Group boxes, tabs, dividers, dots, bars, counters, inputs.	BUILT	Built: 9 field types; no icon / image-frame widgets.
Widget search and categories	Find components; browse containers/trackers/inputs.	MISSING	Not built — fields come from JSON; no browser.
Drag-and-drop placement	Place widgets with a ghost preview + valid-drop feedback.	BUILT	Built: react-grid-layout with ghost preview.
Keyboard / controller placement	Select-move-confirm as an alternative to dragging.	MISSING	Not built.
Snap-to-grid layout	Align widgets, prevent overlaps, responsive columns.	BUILT	Built: locked decision, fully implemented.
Group and tab authoring	Add/rename/reorder sections that become Tabs/List blocks.	PARTIAL	Partial: page tabs built; in-page group reorder external.
Post-placement configuration	Open new widget's properties immediately to configure.	PARTIAL	Partial: field-picker per block; no full inspector.
Visibility rules	Make a widget conditional on perms / combat / context.	PARTIAL	Partial: hide-show toggle; no rule-based visibility.
Density overrides	Keep an important widget visible in Minimal mode.	MISSING	Not built.
Pinnable configuration	GM decides which rows players may pin.	MISSING	Not built.
Cross-density preview	Check the sheet in Full / Compact / Minimal.	MISSING	Not built.

Rules, formulas, and bindings (10/13 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
First-class bindings	Every widget/stat/rule relationship is an inspectable object.	PARTIAL	Partial: 'derived' is the binding; not inspectable.
Link creation	Connect an action/value to its source via the Inspector.	MISSING	Not built — editing is in JSON.
Tiered condition builder	Build IF/THEN logic with structured fields, no code.	MISSING	Not built.

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Advanced formula input	Raw IF/THEN + arithmetic, compiled to the same structure.	MISSING	Not built — expressions live in JSON, not in-app.
Live calculation preview	Show a formula's result on the test character before save.	MISSING	Not built.
Global variables	Cross-cutting qualities (e.g. Size) affecting many values.	MISSING	Not built.
Dependency overlay	Draw upstream/downstream relationships over the canvas.	MISSING	Not built.
Full graph view	Reveal deeper dependency chains.	MISSING	Not built.
Circular dependency prevention	Reject links that create infinite calc loops.	BUILT	Built: cycle detection at load (expression.mjs).
Broken-reference warnings	Surface unresolved/deleted targets in tree/inspector/validation.	PARTIAL	Partial: engine surfaces errors; no rich UI.
Safe deletion choices	Reconnect / freeze / cascade / cancel on dependents.	MISSING	Not built.
Automatic refactoring	Update formulas/bindings when an object is renamed.	MISSING	Not built.
Rule-block config / validation	Toggle modular mechanics; report conflicts before save.	MISSING	Not built.

Entry and facet authoring (7/7 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Guided entry creation	Create Feature/Action/Power/Resource with a starting preset.	MISSING	Not built — no entry concept beyond list rows.
Facet library	Reusable modules: activation, usage, cost, targeting, rules.	MISSING	Not built.
Activate / deactivate facet	Remove a facet from view without deleting its data.	MISSING	Not built.
Migration-safe facet replacement	Keep the old version as read-only history.	MISSING	Not built.
Preset remapping	Change how an entry renders without rewriting facet data.	MISSING	Not built.
Compatibility guidance	Warn when a preset expects a missing facet; offer Add.	MISSING	Not built.
Official tag picker	Apply normalized tags so filters/rules stay dependable.	MISSING	Not built.

Template management (7/8 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Save as Template	Store structure/widgets/formulas/bindings without values.	MISSING	Not built.
Template metadata	Name, description, system tags, author, version.	PARTIAL	Partial: definition has id/name/version/author; not surfaced.
Start from Template	New sheet from starter / personal template / blank.	MISSING	Not built.
Template preview / Clone / Search	Preview, clone for homebrew, search the library.	MISSING	Not built.

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Automatic versioning	Major/minor/patch from structural/formula/cosmetic changes.	MISSING	Not built — schemaVersion exists; no change tracking.
Propagate or pin updates	Migrate existing sheets or leave them on their version.	MISSING	Not built.
Data-preserving migration	Add fields, hide removed widgets, recompute formulas.	MISSING	Not built.
Migration preview / warnings	Show affected sheets and changes before applying.	MISSING	Not built.

Content library authoring (8/10 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Locked content libraries	Browse developer content without altering the canonical copy.	MISSING	Not built.
Customize by forking	Editable project copy of a locked library, origin retained.	MISSING	Not built.
New typed libraries	Homebrew collections: disciplines, merits, backgrounds, etc.	MISSING	Not built.
Schema-driven entry forms	Correct fields + validation for the selected library type.	MISSING	Not built.
Library search and filtering	Search large collections; filter by group axes.	MISSING	Not built.
Strict JSON / CSV import	Validate every row/field, show a diff, block partial imports.	PARTIAL	Partial: character + layout JSON import; no schema diff / CSV.
Database-to-sheet bindings	Make library entries available to stats/actions/inventory.	MISSING	Not built.
Safe library rename / delete	Refactor or list affected bindings before committing.	MISSING	Not built.
Locked-version comparison	Compare a customized library with a newer dev version.	MISSING	Not built.
Custom library export	Export canonical JSON or flat CSV for backup/sharing.	PARTIAL	Partial: character + layout JSON export; no library export.

Accessibility and localization (9/10 missing)

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Mouse and keyboard operation	Navigation, search, editing, dialogs, rolls without touch.	PARTIAL	Partial: mouse works; keyboard nav not explicit.
Controller / adaptive navigation	Focus borders, directional nav, zone jumps, drag alternatives.	MISSING	Not built.
Touch-sized controls	Usable hit areas even when actions move into menus.	MISSING	Not built.
UI and text scaling	Scale separate from density; enlarge without losing content.	MISSING	Not built.
High-contrast mode	Keep focus/state/outcomes legible across themes.	MISSING	Not built.
Colorblind-safe communication	Pair colors with labels, icons, patterns, text.	MISSING	Not built.
Screen-reader descriptions	Announce row state, edit controls, validation, results.	MISSING	Not built.

Feature	Lygiron catalogue — intended	Status	Omni Matrix — built today
Reduced-motion handling	Show results/transitions instantly when preferred.	MISSING	Not built.
Western and CJK localization	Flexible labels/wrapping; no fixed-width assumptions.	MISSING	Not built.
Accessible error recovery	Validation actionable via the same input method used.	MISSING	Not built.

Headline gaps — highest-value new work

The clusters below are where the catalogue describes whole feature areas that are almost entirely missing today — the natural candidates for the next rounds of work, in rough priority order.

1	In-app template / system authoring The entire Unified Template Workspace: Object Tree, Inspector, in-app formula editor, play/edit modes, undo/redo. Build or edit a system without touching JSON.
2	Content library authoring Homebrew collections, library browser, schema-driven forms, fork-to-customize, import/export, version comparison.
3	Roll composition and the dice tray Compose Roll, mixed pools, situational modifiers, split pools, persistent prepared tray, result overlay, roll type tags, whisper rolls.
4	Action Log depth Player-limited visibility, glance/compute/trace levels, linked event chains, whisper discussions, GM ruling notes, log search/filter.
5	Effects and adjudication The whole batch-effect workflow: multi-select, apply to a target set, categories, immediate feedback.
6	GM dice control Opposed rolls, group roll requests, player tray mirror, secret rolls, ad-hoc rolls, challenge parameter control.
7	Layout UX Persistent identity panel, density modes, collapsible groups, sheet search, tag filters, personal pinning, combat-focused view.
8	Stat depth Temporary vs base value separation, inline specializations, formula disclosure by role, manual override, stat-relationship display.
9	Accessibility Almost entirely absent; a full pass is needed before any public release.
10	Character identity Portrait upload / crop, identity card, body-location health summary (partial overlap with Tempus).

Scope note. Body-location health and a 3D health model sit largely in Tempus (product 03), not Omni Matrix. The catalogue lists several items as intentionally out of scope (dedicated mobile app, community marketplace, external imports such as D&D Beyond, AI-generated NPCs, custom dice skins, 3D preview) — these are excluded from the analysis above.
